

Business Premium & Compliance

Microsoft 365, properly configured, secured and managed for your business.

Business Premium & Compliance brings together Microsoft 365 productivity tools with built-in security, backup and device management in one integrated service.

Your Microsoft 365 environment stays secure, backed up and monitored daily, with protection for email, files and collaboration tools, strong identity controls, and clear labelling and sharing policies to prevent data loss.

- ✓ **Microsoft 365 Business Premium Licence**
Windows 11; Microsoft 365 apps: Outlook, Teams, OneDrive, SharePoint, PowerPoint, Publisher, Access.
- ✓ **Advanced Email Security (Proofpoint)**
Protects against suspicious emails, impersonation and advanced email threats.
- ✓ **365 Backup and Recovery**
Independent backup of Microsoft 365 data and configuration.
- ✓ **Visibility and Control**
Centralised management, reporting and audit-ready compliance visibility.
- ✓ **Advanced Threat Protection**
Scans files and collaboration platforms to stop threats early.
- ✓ **Identity Protection**
Secure sign-in, access controls and multi-factor authentication.
- ✓ **Device Management (Microsoft Intune)**
Applies and enforces security policies across user devices.
- ✓ **Information Labelling**
Clear data classification and protection.
- ✓ **Data Loss Prevention (DLP)**
Controls sensitive data sharing.

Please note: This datasheet reflects our service model for 2026.

Business Premium & Compliance

Microsoft 365, security, device management and backup in one fully managed service.

Designed for small and medium-sized businesses, Business Premium & Compliance brings together Microsoft 365 productivity tools with security, backup and ongoing management in one service.

Work securely from anywhere

Access systems and data across devices without putting your business at risk.

Email and identity protected

Reduce the risk of suspicious emails, impersonation and unauthorised access.

Control your data

Clear visibility of your data, where it's stored and who can access it.

Everything managed for you

Security, updates and configuration handled continuously.

We handle the setup, configuration and ongoing management, making sure protections are in place and continue to work as your environment evolves, aligned to recognised best practice standards such as Cyber Essentials.

Business Premium & Compliance

Comparison with a typical Microsoft 365 setup

Business Premium & Compliance

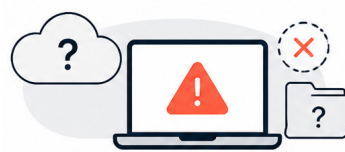

grantmcgregor
technology people

- ✓ Advanced email security (Proofpoint)
- ✓ Independent Microsoft 365 backup
- ✓ Full visibility and compliance reporting (CoreView)
- ✓ Security configured and actively managed
- ✓ Proactive monitoring and support

Typical Microsoft 365 setup

- ✗ Standard Microsoft 365 security
- ✗ Backup **not** included
- ✗ Limited visibility and reporting
- ✗ Tools available but not fully used
- ✗ Reactive support

Comparison based on a typical Microsoft 365 setup and Grant McGregor's Business Premium & Compliance service.

Advanced Email Security (Proofpoint)

Business Premium & Compliance

Protect your business from email-based threats.

Email remains one of the most common ways attackers try to access systems and data.

Standard protection may not be enough to protect against more sophisticated or targeted emails.

What risks Proofpoint addresses

- **Suspicious emails**

Messages designed to trick users into clicking links or sharing information

- **Impersonation**

Emails that appear to come from colleagues, suppliers or trusted contacts

- **Malicious links and attachments**

Hidden threats that can compromise systems or data

Benefits of Proofpoint

- Fewer suspicious emails reaching your team
- Lower risk of email-related security incidents
- Greater confidence in day-to-day email use
- Helps protect business data and user accounts

POWERED BY **proofpoint.**

Key features

- **Advanced email filtering powered by Proofpoint**
Blocks spam, malware and suspicious emails before they reach users
- **Link and attachment protection**
Checks content in real time to reduce risk
- **Impersonation and fraud detection**
Identifies unusual or suspicious sender behaviour
- **Email continuity**
Maintains access to email if Microsoft 365 is unavailable

Included in Business Premium & Compliance

Proofpoint is integrated into your managed Microsoft 365 service.

Independent 365 Backup & Recovery

Business Premium & Compliance

Protect your data. Stay in control. Keep your business running.

Microsoft 365 keeps your business running day to day, but it does not provide a complete backup of your data.

If files, emails or accounts are deleted or affected, recovery can be limited without a dedicated backup solution.

Why backup is essential

• Accidental deletion

Files and emails can be removed quickly and may not be recoverable after a short time.

• Retention limits

Built-in retention is not designed as a full backup and can change with users or licences.

• Security incidents

Data can be affected by ransomware, account compromise or other incidents.

• User-related risk

Mistakes or rushed actions can lead to data being lost or overwritten.

Benefits of CoreView

- Greater control over your business data
- Faster recovery from mistakes or incidents
- Reduced risk from data loss and disruption
- Supports compliance and retention requirements

Security

POWERED BY  N-ABLE

Key features

Automated backup of Microsoft 365 data

- Exchange (email, calendars, contacts)
- OneDrive files
- SharePoint and Teams data

Regular backups throughout the day

- Frequent restore points to reduce potential data loss

Flexible recovery options

- Restore individual files, emails or full accounts

Secure, long-term data retention

- Supports compliance and business continuity

Included in Business Premium & Compliance

365 Backup and Recovery is integrated into your managed Microsoft 365 service.

Visibility and Control

Business Premium & Compliance

See what's happening across your Microsoft 365 environment

Visibility and control across your Microsoft 365 environment to help identify risks, unusual activity and changes that could impact security or compliance.

Key features

- Identifies risky or unusual settings across your environment
- Highlights issues such as excessive access or missing security controls
- Tracks changes to users, permissions and configuration
- Monitors your environment against agreed security standards
- Provides regular reporting and alerts on potential risks

Control

Benefits of Visibility and Control

- Clear visibility across users, access and configuration
- Early identification of risks before they become issues
- Better control over changes and permissions
- Supports compliance and audit requirements

Included in Business Premium & Compliance

Visibility and Control is integrated into your managed Microsoft 365 service.

Advanced Threat Protection

Business Premium & Compliance

Protect email, files and collaboration tools from everyday threats

Advanced Threat Protection adds an extra layer of security across your Microsoft 365 environment. We configure and manage it to help reduce the risk of harmful links, files and suspicious activity reaching your users.

Key features

- Scans email attachments and links before they are opened
- Identifies and blocks suspicious content across email, files and collaboration tools
- Extends protection across Teams, SharePoint and OneDrive
- Helps reduce the risk of unauthorised access and account misuse
- Gives users visibility and control over flagged messages

Security

POWERED BY  Microsoft

Benefits of Advanced Threat Protection

- Scans email attachments and links before they are opened
- Identifies and blocks suspicious content across email, files and collaboration tools
- Extends protection across Teams, SharePoint and OneDrive
- Helps reduce the risk of unauthorised access and account misuse
- Gives users visibility and control over flagged messages

Included in Business Premium & Compliance

Advanced Threat Protection is integrated into your managed Microsoft 365 service.

Identity protection

Business Premium & Compliance

Classify and protect your data across Microsoft 365

Information labelling helps you understand what data you have and control how it is used.

We configure and manage labelling policies so sensitive information is handled appropriately across your organisation.

Key features

- Applies secure sign-in across your Microsoft 365 environment
- Enables multi-factor authentication (MFA)
- Applies access controls based on user, device and location
- Supports secure password policies and self-service password reset
- Helps reduce the risk of unauthorised access

Security

POWERED BY  Microsoft

Benefits of Identity Protection

- Secure access to systems, data and applications
- Lower risk of accounts being compromised
- Clear control over who can access what
- Simple, secure sign-in for users

Included in Business Premium & Compliance

Identity Protection is integrated into your managed Microsoft 365 service.

Device Management (Intune)

Business Premium & Compliance

Secure access to your business data across every device

Device management ensures that only trusted and properly configured devices can access your systems and data.

Set up and managed as part of your service, keeping your information protected wherever your team is working.

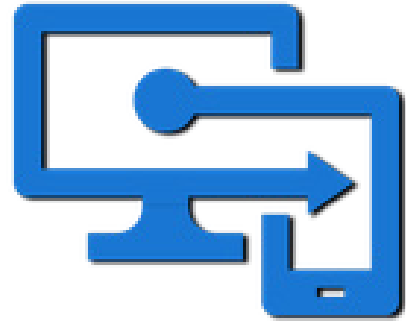

Key features

- Controls which devices can access your systems and data
- Ensures devices meet security standards before access is allowed
- Applies security settings across laptops, mobiles and tablets
- Protects business data on both company and personal devices
- Allows business data to be removed if a device is lost or replaced

Control

POWERED BY  Microsoft

Benefits of Device Management

- Keeps business data secure across all devices
- Reduces risk from lost, stolen or unsecured devices
- Supports secure remote and hybrid working
- Helps meet security and compliance requirements
- Gives you control without adding complexity for users

Included in Business Premium & Compliance

Device Management is integrated into your managed Microsoft 365 service.

Information Labelling

Business Premium & Compliance

Understand and control how your data is used

Information labelling helps you organise your data and control how it can be shared.

We set this up so sensitive information is handled properly across your business.

Key features

- Labels documents and emails to show what can and cannot be shared
- Controls whether files can be shared, downloaded or sent outside the business
- Helps stop important or sensitive information being sent to the wrong people
- Works across email, files and tools like Teams and SharePoint
- Shows how your data is being used and shared

Control

POWERED BY  Microsoft

Benefits of Information Labelling

- Clear visibility of your data and how it is handled
- Better control over what can be shared and with who
- Reduced risk of information being sent to the wrong place
- Supports your data protection and compliance requirements

Included in Business Premium & Compliance

Information Labelling is integrated into your managed Microsoft 365 service.

Data Loss Prevention

Business Premium & Compliance

Stop sensitive data from being shared in the wrong way

Data Loss Prevention helps control how information is shared across your business.

We set rules so sensitive data is protected and only shared when appropriate.

Key features

- Detects sensitive information in emails and files
- Blocks or warns when data is being shared inappropriately
- Controls what can be sent outside your organisation
- Applies rules across email, OneDrive, SharePoint and Teams
- Provides alerts and reporting on data activity

Security

POWERED BY  Microsoft

Benefits of Data Loss Prevention

- Reduces the risk of sensitive data being shared accidentally
- Helps protect personal, financial and business information
- Gives you confidence that data is handled correctly
- Supports compliance with data protection requirements

Included in Business Premium & Compliance

Data Loss Prevention is integrated into your managed Microsoft 365 service.

Business Premium & Compliance

Growing with the right IT partner

Business Premium & Compliance is designed to give you more than just Microsoft 365.

It brings together security, backup and ongoing management in one fully supported service, helping your business stay secure, organised and in control.

Grant McGregor is a people-first Managed IT Provider and cyber security partner, trusted by organisations across Edinburgh and the UK.

With over 25 years of experience, a proactive support model and a focus on long-term relationships, we support your people, systems and security as your business evolves.
